I have received \$ _____
 towards the restoration(s) of the listed radios.
 X _____
 Balance due upon completion:
 \$ _____

Dave will fill this in and send a copy to you.

Details of this Special

An Antique Electronic restoration is the replacement of all paper and electrolytic capacitors in an antique radio. More than 90% of the time this brings a radio back to its original or better operating condition. In this flat rate restoration, I will also include, if any or all are necessary, up to 3 small resistors the dial lamp, rectifier, and line cord. I will also clean, if necessary, all switches and controls, I'll also check the sensitivity and do an alignment only if absolutely necessary. All other parts and services will cost

Conditions

Normally the turn around time to restore a Zenith transoceanic is a day or two. If shipped by priority mail, it could take less than a week from the time you send it to me, Occasionally there are "complications" and the chassis needs parts beyond the paper and electrolytic capacitors and if necessary, dial lamp and line cord. This might make your set take longer to restore. Most of the time,, it does take less than a week if the entire payment is enclosed, See below for more details.

I do **not** accept PayPal, checks, or credit cards. I accept cash or US Postal Money Orders, available only at a US Post Office, only. (Do not send cash through the mail). Please make all Money Orders payable to: Dave's Antique Radio & TV Restorations P.O. Box 285 Liverpool, NY 13088-0285 Please fill out the USPS Money Order Do not leave it blank

Payment Terms

Terms

For fastest service please enclose a US Postal Money Order , with your order, for the entire amount and return shipping. Radios not picked up (no shipping has been paid for) or not paid for at all for within 15 days from the date of completion may be subject to a \$1.00 per day storage fee. Radios still not picked up or paid for after 3 months may be sold to recoup restoration / storage costs.
